

Jydacom – Sub-processors

This list contains an overview of the sub-processors that EG uses in connection with the delivery of EG Jydacom.

Some sub-processors are used exclusively for the provision of elective services. Whether these sub-processors are used thus depends on the individual customer's individual services.

Last updatet 15.05.2024

Ping IT A/S	DK34471967	Vandmanden 24, 9200 Aalborg SV, Denmark	Secure destruction of hardware	No

Approved sub-processors with special terms

Microsoft Corporation

One Microsoft Way
Redmond
WA 98056
USA

As Microsoft Corporation is located in a third country, the European Commission's Standard Contractual Clauses are used as a valid transfer tool. The European Commission's Standard Contractual Provisions have thus been entered into by the data processor with Microsoft Corporation on behalf of the data controller.

The European Commission's Standard Contractual Clauses with Microsoft Corporation states that Microsoft Corporation is entitled to use and replace additional sub-processors. These sub-processors are described in Microsoft's list of sub-processors and can be found here:

<https://servicetrust.microsoft.com/DocumentPage/aead9e68-1190-4d90-ad93-36418de5c594>

In the data processing agreement with Microsoft, it is stated that Microsoft gives a notice 6 months before any new sub-processors are taken into use. This is done by Microsoft updating the above list and the Data Controller must do the following to be notified:

1. Go to the homepage: <https://servicetrust.microsoft.com/ViewPage/PrivacyDataP>
2. Find the document titled "Microsoft General – Online Services Subprocessors List"
3. Press "Save to library"
4. Log in to your Microsoft account
5. Press "Yes" to receive email notifications
6. Enter your e-mail address and specify how often you want to receive notifications, press "Save"

This procedure replaces, as far as Microsoft's sub-processors are concerned, the one described in Appendix B, point B.2.
