

ROOM BOOKING AND CATERING SERVICE

- Optimize the use of your property

With EG MainManager you can define rooms as meeting rooms and link them to various catering packages with associated prices and details.

Room booking & Catering service allows you to rent certain rooms temporarily to both internal and external users. Reservations are managed through a user-friendly calendar, which gives administrators and users an overview of all booking activities. You can make single or repeated reservations, and there is also the option of having an approval process for the reservations.

Other important features include:

- Adaptation of price lists for simplified rooms based on factors such as rental time and target group
- Ability to provide a calendar file via e-mail, so reservations can be imported into your personal calendar
- Manages time periods when rooms are un-bookable
- Efficient management of catering services and rental of equipment
